PROFESSIONAL SUMMARY

Aspiring Data Scientist and BCA student with hands-on experience in end-to-end data pipelines, predictive modeling, machine learning, and interactive dashboards. Skilled in extracting actionable insights from complex, messy datasets to address real-world socio-economic and business problems. Strong communicator adept at combining analytical rigor with user-centric solution delivery.

TECHNICAL SKILLS

- Programming & ML: Python (Pandas, NumPy, Scikit-learn, Joblib), SQL, Gradient Boosting, Cosine Similarity, TF-IDF
- Data Analytics & Viz: Advanced Excel (Pivot Tables, VLOOKUP), PowerBI, Streamlit, Plotly, Exploratory Data Analysis (EDA)
- Backend & Tools: FastAPI, Uvicorn, Git, GitHub, Database Management
- Core Competencies: Data Cleaning/Preprocessing, Analytical Problem Solving, Technical Communication

PROJECTS

- [Women Safety Intelligence Dashboard](#) | Tech Stack: Python, Pandas, Scikit-learn, FastAPI, Streamlit, Plotly
Engineered an end-to-end pipeline processing 2001–2024 NCRB multi-format data, standardizing district/state mapping. Designed a weighted district-level Safety Score algorithm and trained a Gradient Boosting model ($R^2 \approx 0.996$, $\$MAE \approx 1.1$). Built a FastAPI backend and interactive Streamlit UI for multi-year risk trend exploration and district safety rankings.
- [Movie Recommendation System](#) | Tech Stack: Python, Pandas, Scikit-learn (Cosine Similarity, TF-IDF)
Developed a content-based recommendation engine processing thousands of movies using NLP text vectorization techniques. Computed TF-IDF matrices and Cosine Similarity to provide real-time, accurate user recommendations.
- [Housing Price Prediction](#) | Tech Stack: Python, Pandas, Matplotlib, Scikit-learn
Built a regression model to forecast housing prices after extensive EDA, outlier removal, and missing value imputation. Evaluated predictive accuracy through R^2 and RMSE metrics to ensure reliable estate evaluations.

WORK EXPERIENCE

Student Counselor & Telecaller | Learning Point, UP Feb 2026– Present
Managed student admission databases and inquiry sheets daily using MS Excel, ensuring zero data discrepancies. Handled daily conversion tracking and data entry, evaluating outreach efficiency through data-driven metrics. Counseled prospective students on technical curricula, resolving complex queries through structured communication.

EDUCATION

- Bachelor of Computer Applications (BCA) | Shoolini University
2024 – 2027 (Expected)
- O Level Diploma in Computer Concepts – NIELIT
